LeetCode CodeChef Codeforces

EDUCATION

- Indian Institute Of Information Technology**
Bachelor of Technology in Computer Science and Engineering(CSE) - Pre-Final Year
Jabalpur, India
August 2023 - May 2027
- KRSD Public School**
CBSE Class XII PERCENTAGE: 94.2
Mathura, India
April 2021 - June 2022

SKILLS SUMMARY

- Programming Languages:** Python, SQL, JavaScript, C++
- Data Analysis & Visualization:** Tableau, Excel, Matplotlib, Plotly, Pandas, NumPy
- Core CS Concepts:** Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Statistical Analysis
- Machine Learning & Analytics:** Scikit-learn, TensorFlow, Statistical Modeling, Predictive Analytics
- Databases & Big Data:** SQL, PostgreSQL, MySQL, MongoDB, Query Optimization
- Development Tools:** Git, RESTful APIs, Postman, Data Pipeline Development
- Soft Skills:** Problem Solving, Analytical Thinking, Stakeholder Communication, Data Storytelling

PROJECTS

- BigDocs - Healthcare Management System**
 - Delivered comprehensive healthcare analytics platform featuring AI disease prediction with 92% accuracy across 100+ diseases, demonstrating strong statistical modeling and machine learning implementation skills. [GitHub](#) | [Website](#) | [Demo Video](#)
 - Built real-time appointment system supporting 50+ concurrent users with data-driven insights for managing 1000+ medical records daily, showcasing ability to handle large-scale data operations.
- TrackFolio - AI-Powered Career Analytics Platform**
 - Developed sophisticated ATS tracking system with multi-dimensional scoring across 15+ parameters, achieving 12% improvement in compatibility scores through advanced analytics and TF-IDF analysis techniques. [GitHub Repository](#)
 - Implemented intelligent data processing pipelines using statistical analysis, delivering 3.2x improvement in system performance with 89% enhancement in analytical accuracy through advanced NLP and ML techniques.
 - Engineered candidate matching algorithms using semantic similarity and cosine similarity metrics, demonstrating proficiency in building data-driven recommendation systems for business applications.
- Plant Z - AI-Powered Plant Healthcare Analytics Platform**
 - Built CNN-based ML pipeline achieving 98% accuracy on 87K+ plant disease images, highlighting expertise in data preprocessing, modeling, and predictive analytics. [GitHub](#) , | , [Demo Video](#)
 - Designed analytics dashboard for tracking engagement, care patterns, and community data, translating business needs into actionable KPIs.
 - Integrated Gemini API with conversation analytics and token optimization, improving pipeline efficiency and cost-effectiveness.

ACHIEVEMENTS

- HackByte 3.0:** Secured top 8 position among elite 120 teams selected from over 1,200 participating teams nationwide, demonstrating exceptional analytical problem-solving skills and innovative data-driven solution development.
- Flipkart Grid 7.0:** Semi-finalist in one of India's largest tech challenges, showcasing advanced problem-solving capabilities and technical expertise in competitive programming and system design.
- Competitive Programming Excellence:** Achieved Knight badge on LeetCode, attained 4-star rating on CodeChef, and reached Pupil rating on Codeforces, demonstrating strong quantitative and analytical problem-solving abilities essential for business analysis.
- Leadership & Communication:** Piloted city-wide debate initiative involving 20+ competing teams, demonstrating stakeholder management and communication skills crucial for translating data insights into actionable business decisions.
- Technical Innovation:** Built a line-following, remote-controlled robot car that can pick up and move weights over long distances, and placed fifth out of 50+ teams in the ERS club of IIITDMJ's Robo Rush 2024 competition.
